

Options for program evaluation

Dr Brad Astbury
ESF MH Showcase

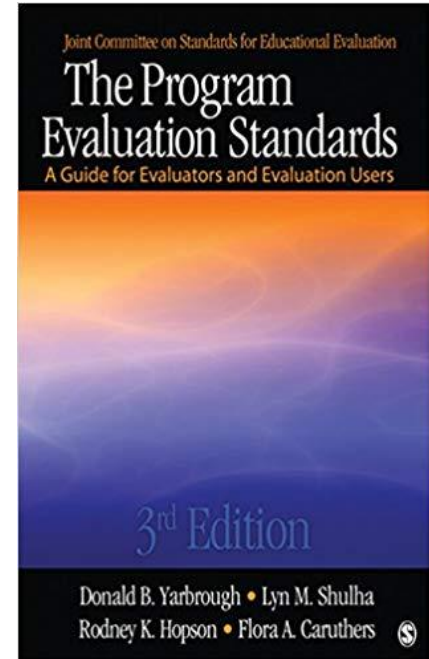

A very brief history of evaluation

Principles-based evaluation

- Fit-for-purpose
- Useful
- Robust
- Ethical and culturally appropriate
- Credible
- Transparent

Dimensions of an evaluation plan

- What is the evaluation for? Why are we evaluating?
- Who is the key audience(s) for the evaluation findings?
Who should be involved?
- What resources do we have available?
- How are we going to do it? (approach, questions and methods)
- How will we report findings?
- Are there any ethical issues?
- How much time and resources do we have?

Thank-you!
